SUMMARY

C/C++ systems developer with hands-on experience in building ATS-friendly tooling, multithreaded file processors, and embedded-oriented software. Strong focus on performance, clean architecture, and low-level problem solving.

EDUCATION

B.E Electronics and Communication Engineering
XYZ Engineering College
Batch: 2021 - 2025

EXPERIENCE

Embedded Systems Intern â Revoh Innovations

- Developed C/C++ modules for data processing and validation, implemented CLI-based tools, optimized file parsing logic, and collaborated with engineers to debug and test embedded-oriented software components.

PROJECTS

ATS Friendly Resume Engine

- Designed universal JSON resume schema for multiple roles
- Implemented strict validation and parsing in modern C++
- Built CLI tool to render ATS-optimized text and PDF resumes
- Handled optional sections dynamically without layout breaks

Multithreaded File Processor

- Implemented parallel file parsing using C++ threads
- Reduced processing time by approximately 3x
- Ensured thread safety and predictable output ordering

SKILLS & TOOLS

- languages: C++, C, python
- embedded system: stm32, esp32, arduino
- pheripherals: rtos, uart, i2c
- GCC
- VS Code
- Git
- Linux
- CLI Tools
- Debugging (GDB)

CERTIFICATIONS

Embedded Systems using Raspberry Pi

- Hands-on training focused on embedded programming fundamentals and hardware interaction.
