SUMMARY

Full-stack developer with 2+ years of experience building scalable web applications and data-driven solutions. Proficient in modern JavaScript frameworks, Python, and cloud technologies. Strong focus on writing clean, maintainable code and delivering user-centric products. Passionate about leveraging data analytics to drive business decisions and optimize application performance.

EDUCATION

B.Tech in Computer Science and Engineering
Indian Institute of Technology, Delhi
Batch: 2019 - 2023

Higher Secondary Education (CBSE)
Delhi Public School, R.K. Puram
Batch: 2017 - 2019

EXPERIENCE

Software Development Engineer - Flipkart

- Led development of microservices architecture for inventory management system serving 100K+ daily transactions. Optimized database queries reducing response time by 45%. Collaborated with cross-functional teams to implement real-time analytics dashboard using React and Node.js. Mentored 3 junior developers and conducted code reviews to maintain high code quality standards.

Full Stack Intern - Zomato

- Developed RESTful APIs for restaurant recommendation engine using Python Flask and PostgreSQL. Implemented responsive frontend features using React and Redux, improving user engagement by 30%. Integrated third-party payment gateway APIs and handled error handling for edge cases. Participated in Agile sprints and daily standups with engineering team.

Data Analysis Intern - NITI Aayog

- Analyzed large datasets (5M+ records) on urban development indicators using Python pandas and NumPy. Created interactive data visualizations using Plotly and Tableau for government stakeholders. Built automated ETL pipelines to process census data and generate weekly reports. Presented findings to senior officials, influencing policy recommendations.

PROJECTS

E-Commerce Platform with AI Recommendations

- Built full-stack e-commerce application using MERN stack serving 5000+ registered
- Implemented machine learning recommendation system using collaborative filtering
- Integrated Razorpay payment gateway and automated order tracking with email
- Deployed on AWS EC2 with CI/CD pipeline using GitHub Actions, achieving 99.9% uptime
- Optimized MongoDB queries and implemented Redis caching, reducing page load time by

Real-Time Chat Application with Video Calling

- Developed scalable chat application using Socket.io and WebRTC supporting 1000+
- Implemented end-to-end encryption for secure messaging using CryptoJS library
- Built group chat functionality with file sharing capabilities up to 10MB per file
- Created responsive UI using React and Material-UI with dark mode support

- Containerized application using Docker and deployed on Kubernetes cluster

SKILLS & TOOLS

- languages: JavaScript (ES6+), Python, Java, C++, SQL, HTML5, CSS3
- frontend: React.js, Redux, Next.js, Vue.js, Angular, TypeScript, Material-UI, Tailwind
- backend: Node.js, Express.js, Django, Flask, FastAPI, Spring Boot
- databases: MongoDB, PostgreSQL, MySQL, Redis, Firebase, DynamoDB
- cloud & devops: AWS (EC2, S3, Lambda), Google Cloud Platform, Docker, Kubernetes,
- VS Code
- PyCharm
- Postman
- Jira
- Figma
- Tableau
- Jupyter Notebook
- MongoDB Compass
- pgAdmin
- Slack
- Trello
- Android Studio

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

- Demonstrated expertise in designing distributed systems on AWS platform. Covered compute, storage, database, networking, and security services with hands-on labs and real-world scenarios.

Google Data Analytics Professional Certificate

- Comprehensive training in data cleaning, analysis, and visualization using SQL, R, and Tableau. Completed capstone project analyzing e-commerce sales data and presenting actionable insights.

Meta Front-End Developer Professional Certificate

- Advanced training in React, responsive design, and modern web development practices. Built portfolio of 5+ responsive web applications using industry-standard tools and frameworks.
